### **The NEW Panasonic Toughbook F8**

When you're on the road, you need tools that are dependable and can handle the elements with ease. That's why you need a Toughbook® F8 laptop, the lightest 14.1" widescreen 3G-ready PC available with a DVD drive, complete with the Toughbook durability that you've come to expect. It's portable, thanks to an integrated handle, and has optional Gobi™ Global Mobile Internet so you can connect using 3G wirelessly almost anywhere. Add to that increased security and remote management with Intel® Centrino® 2 with vPro™ technology. And, with its magnesium alloy case, you can rest assured that no matter where you go, your Toughbook F8 will be strong enough to survive, and thrive, so you can keep working.
